About Me

A talented, creative and driven designer with a strong interest in layout, typography and branding. My approach focuses on simplicity and intelligently thought through ideas and concepts. Negative space is an important element of my layouts.

My working methods for solving problems and creating visuals clearly communicate the story behind my ideas. I always generate, expand and refine a range of concepts. Continuously and consistently performing a self-critique throughout the creative process. I always deliver my work to the high standards with careful and well considered presentation.
